OUR PROCESS

WWW.ARCOPOD.COM.AU

1. INITIAL CONSULTATION:

Your Arcopod experience begins with a personalised consultation. Here, we listen to your needs, understand your lifestyle, and start shaping a home that reflects your vision.

2. DESIGN AND CUSTOMISATION:

We offer a wide array of off-the-plan designs featuring various rooms and layouts, ensuring diversity to suit different preferences. While these designs serve as a solid foundation, we excel in customisation. Our team collaborates with you to tailor these designs, incorporating modifications and unique features to make your home truly yours.

3. PRE-CONTRACT:

In this pivotal stage, we conduct a comprehensive site analysis and engineering assessments, including soil tests and footings, to tailor our designs to your land's unique features. We handle all council-required approvals, ensuring your home complies with local regulations. This phase allows for minor design adjustments, setting a solid foundation for your dream home and smoothing the path to construction with clear, open communication.

4. OFF-SITE CONSTRUCTION:

Our modern, purpose-built factory is where your home takes shape, immune to weather-related delays. This controlled environment guarantees excellence in build quality, efficiency in production, and minimal environmental impact.

5. QUALITY CHECKS AND FINISHING TOUCHES:

We subject each module to stringent quality checks, ensuring every detail aligns with our high standards. Premium finishes and fittings are added to elevate the comfort and aesthetic of your home.

6. TRANSPORTATION AND ASSEMBLY:

Completed modules are transported to your site and skilfully assembled by our experts. This phase is marked by efficiency, precision, and minimal disruption to the site environment.

7. HANDOVER AND AFTERCARE:

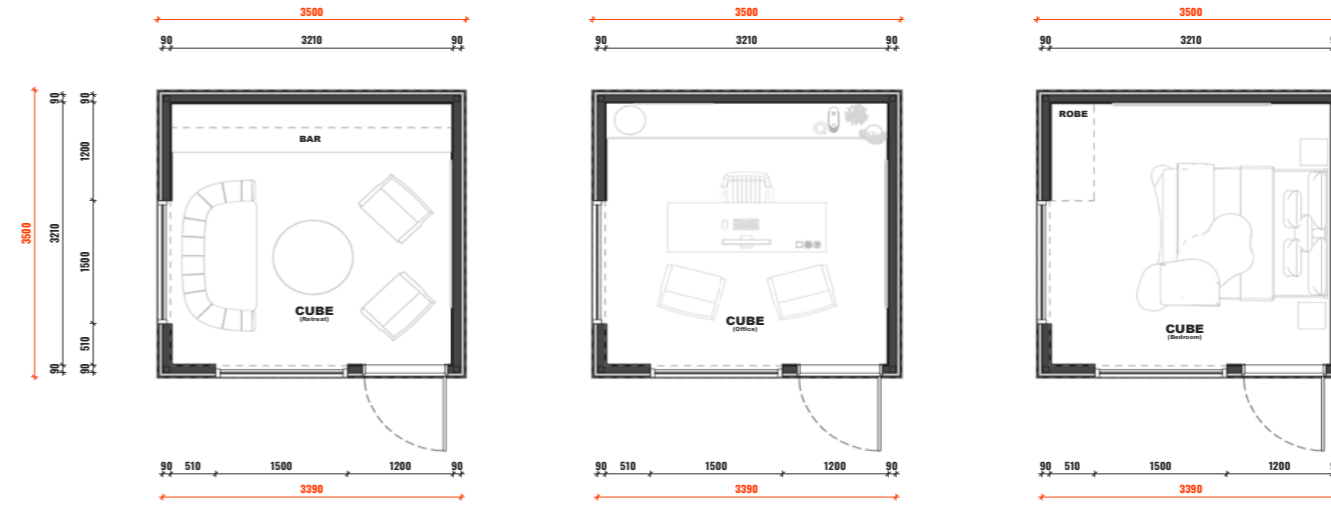

The handover of your new home marks the beginning of your life in an Arcopod residence. We guide you through every feature, ensuring your satisfaction.
